

Cambridge Mass.  
Jan 9-1886.

My dear Mr. Kennedy,

This year certainly botanists seem to "hibernate" here. J. M. Coulter has arrived and is staying with Barnes nearby. I was at the Garden this P.M. and there were Dr. Gray and Messrs. Watson, Bailey, Barnes & Coulter a goodly assemblage to be among. Winter has come at last, and your "pussy" willows must put their heads back again.

The Cornus certainly does

grass in Plymouth and I should  
like to go down for it, if it  
is possible. Our Botanical  
Boxes are progressing.

The *Leloxinella* I got on  
Blue Hill has discharged  
its macrospores copiously,  
and I have collected them  
in a paper pocket.

Bailey is preparing a Synopsis  
of the Genera of N. A.  
for publication. It will be  
a useful work. He is  
well up in the subject.

Sincerely yrs.

Walter Deane

Deane, Walter. 1886. "Deane, Walter 9 Jan 1886." *George Golding Kennedy correspondence*
