

Jaffrey, N.H.
July 13, 1898

Dear Dr. Kennedy,

I was very glad to get
your letter from Ind. Washington
dated June 27. We were about
starting for Jaffrey. I have
heard very little of Mr. Faxon's
death except a few hurried
words from Rand whom I met
at Dr. Goodwin's breakfast.

What you say about
Acrostaphylos ^{is very interesting.} alpina. Happy
thought. Make a note for
"Rhodora". I trust you can
give me a bit showing the
influence.

Well here we are settled
for the present. Mrs. Deane is
quite well and walks daily.
I have a few things in
press. Dr. Robinson & I are

making out a list of Jaffrey
plants that we have put into
The Club. Herb. He is up
here with his wife, his two
brothers and their wives,
six Robinsons together! all
very nice.

I am listing the birds of
Jaffrey at this season. They do
not differ much from those at
home, but I find Juncos, Myz.
The, Blackburnian & Parula
Warblers. I have about 52 sps.

To-day for the first time it is
raining. Rain is much needed.

Give lots of love from us
both to all. If you are with
Mr. Williams, tell him I got
his Postal all right.

Dr. Robinson & I have been
looking up *Lycopodium complan-*
atum, var. *chamaecyparissus*. He
shows me what seems to be the thing.
Thine Walter Deane.

Deane, Walter. 1898. "Deane, Walter 13 Jul 1898." *George Golding Kennedy correspondence*
