

game. to ask him to
give something to
arrange the games
collection but he
never answered my
letter.

I hope that the
case will be done
~~on~~ next week and
hope to see you
soon after. When you
come would you please
bring the key to the
Bot. Club Room. You
will not need that
key now since the
mosses are in room
47 to which you can
have a key if you
wish. Yours truly
W. E. Foulton

Cawlin Dr
Dec 13,
1889.

Dear Doctor,

I should say
that the moss was
certainly Amblystegium
subtile. I am rather
surprised not to see
it in G. r. o. c. t. s
Vermont list as the
species is not uncom-
mon at Shelburne,

at Lake Dunmore
I got Ambly. confervoides
but not in fruit, at
Shelburne this October
I got a considerable

number of mosses
considering my short
stay and the weather.
I have some specimens
I would like to send
to you but it is too
dark now for me
to find them.

The Lulliman
& James and Gray
mosses and hepatics
have all been moved
to the Museum and
this week the carpenter
is putting up a new
case in Seymour's old
room for them. The
Bot. Club Herbarium
has been moved to the

Garden and I have
put Seymour and
Piquet into the little
room.

True is here for
the year and is working
hard on Diarrhea. If
I had money enough
I would try to engage
him to set the
mosses to rights as
he is careful and
critical. But it is
quite out of the
question to think
of engaging him
for there is no money.
I wrote to Brookwood

Farlow, W. G. 1899. "Farlow, William G. 13 Dec 1899." *George Golding Kennedy correspondence*
