

39 Gineford St.

London, W.C. Aug. 24.

Dear W. Kennedy:

I wish you could join me on the side trip I am now about to start upon, but that I know is out of the question. But I want you to know where I am so that should you reach London this week you won't look for me in vain.

Tomorrow morning I join my friends the Browns on a trip to northern Wales where we are hoping for bright weather and a good day on Snowdon Wednesday. Then they will go on to Liverpool and I shall come back by way of Oxford.

I have written Professor Vines, and if it is now possible to get at the Sherard Herbarium I shall spend Friday and Saturday at that work, hunting for Pursh types. I have done practically nothing but sight-seeing and short trips into the country since I reached London, but after I have seen what Pursh left with Sherard I shall be prepared to hunt more intelligently in the London herbaria.

I am writing Mr. Arthur Bennett that I am to return from Oxford on Saturday & that I am hoping to find you in London next week. I am looking for a note from him when I return, and then I hope we can go together to see him at Croydon.

I have been a regular reader all summer, and whenever I have planned or attempted a mountain trip there has been heavy rain. It is pouring in London today, so that I am encouraged to think it may clear by Wednesday morning. I hope so, for I am anxious to get at the northern species which form my problem. It will be fine to have you within reach, and I hope I shall have a note next week saying that you are all in London and well. With warm regards to all,

Very sincerely yours,
Herbert A. Steward.
