=====

EXCURSION TO PLYMOUTH AND BARNSTABLE COUNTIES.

A great many specimens from south-eastern Massachusetts have been collected in July, August and September. Very few botanists have been to the region in May and June, and there are in the Club Herbarium but few specimens collected earlier than July 1st. In order to balance the collection, and to look for a considerable number of early-flowering coastal-plain plants never yet found in New England, the Excursion Committee is planning a trip for Saturday, June 10th.

There is no good central point for a rendez-vous in the Cape Cod region, so it seems best to assign territory to squads in advance, that they may get the first morning train out from Boston, or make other arrangements to suit their convenience.

Please communicate with the Chairman of the Committee, and get an assignment of territory. The expense for such a trip need not be large.
