Jan. 23, 1902.

Dear Dr. Kennedy,

I have two or three hepaticas I have picked up at different times. May I send them to you for determination? One will probably interest you as it comes from Willoughby. This plant was referred to Dr. Farlow who pronounced it *Grimmia rupestris* (provisionally). It was not given by Dr. Howe in his Vermont Hepaticae and so I reported it, ^{to him} and later specimens were sent. These were by him sent to Columbia whence came the opinion that the plant was *G. barbifrons*. Whatever it is it is evidently a plant seldom collected in Vermont as Dr. Howe in his list cites only two stations.

Sincerely yours,

F. G. Flayd.

Floyd, Frederick Gillan. 1902. "Floyd, Frederick G. 23 Jan 1902." *George Golding Kennedy correspondence*
