

Plymouth, N.H.,
April 3, 1898

Dear Dr. Kennedy; -

I have been so
busy getting my revision of
Eurhynchium ready for the May
Taney Bulletin that I have not
answered either of your two last
letters.

I have just received notice of
my election as a non-resident
member of the New England
Botanical Club, which honor I
fully appreciate. I have an idea
that my thanks should be tendered

to you.

I have just found Leskea
tristis here in Plymouth (Det.
Dr. Best) but cannot lay my
hand on a piece at this minute
as my last months collections
are not yet mounted. I should
like to see your Whilloughby
specimens or as to be able to
put it on record as examined
by myself for I shall ^{be a bit of additional} ~~be a bit of additional~~

I inclose a specimen of ^{with a view} ~~to publication.~~
Plagiatherium Mullerianum Ach.,
the first satisfactory New England
material I have seen. Have you
ever collected it?

I find that one of the greatest
disadvantages in studying mosses
is the lack of reliable information

concerning the distribution of
species. How would a
Mass. - Flora of New England,
somewhat after the plan of my
list, appeal to you?

I expect my list to be sent
immediately and will wait for
a copy as soon as it comes into
my hands.

Sincerely yours,
A. J. Grant.

Grout, A. J. 1898. "Grout, Abel J. 3 Apr 1898." *George Golding Kennedy correspondence*
