

GEOLOGICAL SURVEY OF CANADA,

Robert Bell, M.D., D.Sc. (Cantab.), LL.D., F.R.S., I.S.O.,

ACTING DEPUTY HEAD AND DIRECTOR,

OTTAWA, 13th February, 1906.

Dear Dr. Kennedy,

Your letter of February 8th acknowledging the mosses and telling me of your trip was duly received. You must have had a delightful time and reading of all you saw and did makes me almost envious, but we each have our blessings to be thankful for I suppose. I have asked my father about *Mnium Seligeri* and he says that he has no eastern duplicates that he can lay his hands on at present, but we will keep it in mind and if in going over our moss duplicates we happen on this species specimens will be sent you. I was greatly pleased when I received word that I had been made a member of the New England Botanical Club, and that will be another inducement to go to Boston when I can spare the time and when I have the means, but, as I said in my last letter, I hope that we shall see you here before I am in Boston for it is not at all likely that I shall be there in the near future.

With kind regards to your family,

I remain,

Yours truly,

J. M. Macnam

Macoun, James Melville. 1906. "Macoun, James M. 13 Feb 1906." *George Golding Kennedy correspondence*
