

VIEW OF WILLOUGHBY LAKE, WESTMORE, VERMONT.

Aug. 23, 1905-

Dear Dr. Kennedy:

Had I known you were abroad, I should not have been sending notes and cards to your Readville address. I write this to give a sort of summary of my observations here the past three weeks.

I suffered one nice specimen

The *Permyssyal* is common in a  
large pasture near Mill-brook  
and the *S. pinacea* has quite a colony -  
you can find it just over against the  
Richardson Place on the So. West-side  
of Mt. Horr ridge, by taking the So. Bar-  
ton Road - the road that leads from Wm.  
R's. to So. Barton.

Hoping that you may return home in good  
health and spirits, I am

Very Truly yours  
Geo. H. Tilton.

I *Actaea eburnea* & wither  
not seeing how I could pre-  
serve the large root-stalk.  
But Mr. Rich has preserved the  
specimen & sent him and I  
must refer you to that. A few  
days <sup>ago</sup> I discovered *Solidago jun-*  
*cea*, Ait. just over the Mt. Horr  
ridge from Mr. Richardson.  
I have a nice specimen of  
this in press for you. Also of  
the *Hedeoma*. This makes five  
specimens in all I have been per-  
mitted to report:-

*Botrychium leucomaria* Desv. } 1904  
*Scrophularia leporella* (Benth.) }  
*Actaea eburnea* Rydb. }  
*Hedeoma pulegioides* Pers. } 1905  
*Solidago juncea* Ait. }
