

[from H.L.]

Middlebury Vt. Nov. 20, 1920

My dear Mr. Deane:-

I returned yesterday by parcel post your last summer's collection of Viola, with my opinion as to their names. They were substantially what you had previously sent me. I fear you cannot find V. (fallens) glandera at Philbrook Farm. Do you know its altitude above sea-level, or approximately the average summer temperature? In our N. mountains V. flanda does not ascend as high as V. fallens by about 2000 ft. I don't forget that in V. incognita var. Forbesii there seems to be some V. flanda blood. But who knows how long ago & from whence this came. It is very likely decades ago, so that, as the German botanist would say, the plant is now to be considered a well-established "blend-species."

I notice the unexpected absence from your collections in Coos Co. of V. Selkirkii & of all

the northern caerulean violets, *V. adunca* & *compta*,
V. canadensis & *V. pubescens*. Perhaps you have
them, but understand them satisfactorily.

I fear that our good friend H. Schreyer Mathews
is appalled by the number of line-drawings I
want from him; but unless he is overwhelmed
with other tasks or is suffering from ill health, he
will be able to do the work. He should bear in
mind that the reduction in size is to be made
by the plate-maker & not by the artist, except in
a very few cases when I would use figures
from the Illustrated Flora.

Glad you are so well & comfortable in
these stormy days. But you are several
years my junior. I trust Miss Brown is
still with ^{you}. With kind regards to both of you.

Faithfully yours,

Ezra Brainerd.

Brainerd, Ezra. 1920. "Brainerd, Ezra Nov. 20, 1920." *Walter Deane correspondence*
