

Emma, Mo. June 16 '13

Prof. Walter Deane

Harvard University  
Cambridge, Mass.

Dear Sir:

I take the Liberty to send you enclosed  
two specimens of *Nabhalaea*  
*dealbata*, Kunze found by me  
in Russell Co, Kansas a week  
ago, June 7<sup>th</sup> 1913.

Since the limestone ledges of Independence, Mo. are crushed up for  
gravel Roads this plant get rarer  
there from year to year and may  
be exhausted soon. An other  
Place in Mo. is Farley, Mo. - but  
it seems to me, that the Home  
of *Nabhalaea dealbata* is the  
middle part of Kansas, where it  
grows luxuriant in Russell Co  
and in the Environs of Manhattan.  
With best regards,  
W. H. Deane

Demetrio, C. H. 1913. "Demetrio, Carl Hermann Jun. 16, 1913." *Walter Deane correspondence*
