

Rutland, Vt., Apr. 18, 1902.

My Dear Mr. Deane,

I enclose a list of answers to your inquiries. I have been in habit of sending both you and Dr. Earnes of Bridgeport all my forms of *Crataegus*, whether named or not, but am getting so many unnamed ones now that I shall not send unnamed ones unless you ask for them. My numbers 1 & 2 are from Dr. Fretz of Sellersville, Pa. and

3, 4, & 6 are from V. H. Chase
Wadsworth, Petra, Ill. Perhaps
you won't care for them.
I did not intend to list
them as Nt. plants.

The material I sent as
dilatata from Rutland,
last year, is b. declivis
Ashe. Have you good
material of Holmesiana?

Did I send you fruit of
2299, scabrida,?

My submollis I feel
doubtful in regard, but
will have that and flabellata
this year. Pres. Brainerd
and I are going to Jack's
station near Montreal
in the flowering time and
I am tempted to go to the
Arboretum.
Yours truly
W. W. Eggleston

Eggleston, W. W. 1902. "Eggleston, Willard Webster Apr. 18, 1902." *Walter Deane correspondence*
