BUREAU OF PLANT INDUSTRY,  
WASHINGTON, D. C.

DRUG-PLANT AND POISONOUS-PLANT  
INVESTIGATIONS.

Foxboro, Mass. Jan 6<sup>th</sup> 1915.

My dear Mr. Deane  
Your letter of Jan. 1 forwarded here,  
where I am for a few days owing to the death  
of a relative. I had to hear that Fridge Blench  
ill found Hydrophyllum canadense in  
Pownal. I have an indistinct remembrance  
of finding it in Rhodora. I have not kept up  
the records of new Vt. finds for the past  
eleven years, so I have had a lot of work  
to really get in touch and be sure that  
our new manuscript told the entire  
story. I had the editing work passed on to  
me last fall and was also told that it  
must be done at once, because we would  
not be sure of getting it printed unless it  
started. So I have had to depend on my  
friends, in a measure, for much in-  
formation. Am in hopes that Sargent has  
been able to send you the Ellicea variety  
specimen. Mr. R. B. Wheeler of Townsend  
Vt. reports H. perpurea. Does he have a  
specimen in the N. E. C. H. or the Gray H.?  
Am I remember, Mr. Matthews had fresh fruit of  
most of the C. raticorus fruits that he drew, and  
the measurements mean fresh fruits.  
Expect now that I shall visit Cambridge  
in February and shall be glad to examine

any crataegus that you have.

Very truly yours

Willard W. Eggleston
