My dear Mr. Deane,

I am editing the new edition of the Vermont Flora and now that I ~~XXX~~ have my herbarium handy for reference (the first time in ten years) it seems like old times to see your nice specimens.

You published a list of the Utricularia of New England in July 1904.

That was just at the time that I was going to New York and I am afraid that I did not give you all of the information possible in regard Utricularia ^r purpurea specimens of Dr. Ferdinand Blanchard. Dr. Jesup put very little material into his herbarium at Hanover that he had collected in his twelve year experience at Amherst, Mass. He often let students have duplicate material and H.E. Sargent and I took all of the duplicates that we wanted, Senior year. We drew cuts when there was only one specimen and Sargent ^{got} a specimen of Utricularia from Dr. Blanchard. Perhaps you have found out about this specimen. I would not want to say that there is no specimen of the species in the Jesup herbarium. I will write Mr. Harold G. Rugg in Hanover, and have him send you the specimen if there is one.

Can you give me any stations for Utricularia purpurea in Vermont or any other stations for the rare ones?

Have you any station for Hydrophyllum canadense in Vermont or New England yet? Am in hopes of getting to Cambridge sometime within a month.

Very truly yours

W. W. Eggleston.

P.S. Am also writing Sargent at Wolfeboro.

Rich low woods Hootie River

June 30 + Sept. 26 1904. Coll. J. R. C.

1905
99-102

Eggleston, W. W. 12-31. "Eggleston, Willard Webster Dec. 31, 19xx." *Walter Deane correspondence*
