

New Haven. Jan. 17, 1891

My dear Mr. Davenport.

I think the *Pteris* is a sport of *P. longifolia*, but so peculiar that you might give a name & description to it. *Hieracites* #385, from Chiapas is cheffy in the same way - Even in your stage of the lower pinnae which are simple are shorter than the middle ones.

Yours very truly

Samuel C. Eaton.

The weather is so bad that I can't mail the fern to you till Monday.

Eaton, Daniel Cady. 1891. "Eaton, Daniel C. Jan. 17, 1891." *George Edward Davenport correspondence*
