SECRETARY: A. B. KLUGH.

GUELPH, ONT.

Feb 22 1906

Geo. E. Davenport Esq.

Dear Sir: -

I am very greatly obliged to you for the Blue-prints of Asplenium-trichomanes x retamuraria which you so kindly sent me. I had read your article in Jan. Rhodora with a great deal of interest.

Hybridism has always been a most fascinating subject to me, and I hope soon circumstances will permit me to conduct some experiments in hybridism which I have had in mind for some time. I am much inclined to think that Hybridism accounts for a good many of the puzzling forms which we find in Asplenium and Solidago.

Have you tried Solis, Davis and other "printing out" papers in reproducing fern fronds? I have obtained most excellent results in this way - every veinlet showing distinctly. You have to over-print and then tone pretty heavily.

Yours sincerely

A. B. Klugh.
