

TWO NEW COMBINATIONS

BY

LOUIS O. WILLIAMS

Stelis rufobrunnea (*Lindl.*) *L. O. Williams comb. nov.*

Pleurothallis rufobrunnea Lindley Fol. Orch. Pleurothallis (1859) p. 36.

MEXICO: *Arsène* 6027, 6373, 6971; *Galeotti* 5036; *Nagel & Navarro* 6203; *Vera* 7122.

Through the courtesy of Sir A. W. Hill and Dr. V. S. Summerhayes a specimen of Nagel and Navarro has been compared with *Galeotti* 5036, the type of *Pleurothallis rufobrunnea*, and they inform me that there is no appreciable difference in the two specimens. The species is undoubtedly a *Stelis*.

Pleurothallis rhynchantha (*Reichb.f. & Warsc.*) *L. O. Williams comb. nov.*

Restrepia rhynchantha Reichenbach filius & Warscewicz in Bonplandia 2 (1854) 114.

Barbosella rhynchantha Schlechter in Fedde Repert. 15 (1918) 263.

This Andian species is referable to *Barbosella* Schlechter, but this genus has been reduced to *Pleurothallis*.

Williams, Louis O. 1939. "Two new Combinations." *Botanical Museum leaflets, Harvard University* 7(10), 188–188. <https://doi.org/10.5962/p.295141>.
