

U. S. DEPARTMENT OF AGRICULTURE,
DIVISION OF BOTANY,
WASHINGTON, D. C.

January 14, 1896.

Mr. Walter Deane,
Cambridge, Mass.

My dear Mr. Deane:-

I return to you to-day your Thaspium collected by Mr. Pollock, as well as the Zizia which I seem to have had on hand some time. The Zizia is distinguished from the Thaspium chiefly by the fruit not being winged and the central fruit in the umbel being sessile. I do not think there is more than one species of the Thaspium aureum group and if so, it is a little hard to say what name should be used. I have not been able to take up the question since I wrote to you and I really have no new information to send you.

I send you also a few additional specimens, some of which may be of use to you.

Professor Wheeler is now at work in the herbarium and will be here several weeks.

I also send you a set of ^{my} photographs which you may wish to put in your herbarium.

Yours very truly,

J. M. Rose
Assistant Botanist.

Rose, J. N. 1896. "Rose, Joseph Nelson Jan. 14, 1896." *Joseph Nelson Rose letters to Walter Deane*
