

Cushing Street
Oct 11. 1912

My dear Deane,

I think of it! To-morrow will be Nov. 27th Pitt-day! It is hard to believe, I anticipated her gift, you will recall, by sending her, or rather, giving her during the summer two of the three Birl-Books you commended. Mrs Bailey has the third, so that next year we can have a fine still hunt.

Yesterday I had a sweet, breezy letter from an girl, who seems cheerful and happy. Mrs Bailey still greatly feels her loss. You did indeed surprise me by your news of the magnetic effects of Myriophyllum and Ignisat. I wish I had been along. I think another time we must stand out in the direction of the big oak and the saesofrassos — if that be the right plural. My back-land, or rather, Mrs Bailey, is still go-

2 germa with salvia and antimonium
Compositae, They are ever a delight
to me even to their rank odours,
No sign of frost yet in an garden;
indeed, it has been unusually
and abominably hot here, it takes
hold of me distastefully, it is three
days since I have felt able to go
out & today it looks like rain, I
fancy, however, the clerk of the
weather is on vacation - or his
flumming out of order.

Dear old Paul sent me
today - just as I was wishing
for something to read, a fascinating
looking book, so I can curl up in
peace. Really, however, I ought
to be writing for the Journal, they
want a MS of mine on Cobaea scan-
dena or I'd have to go to work. It
means a little money to me.

Good-bye - Glückselig
und auf Wiedersehen!
Pauline
