

were tightly curled and would not be fair. So the  
slips are far from being as neat as they should  
be. But at least the specimen will show that we  
had a plan for you even if the execution fell below  
what we wished. You need feel no dear us out of  
obligation to keep them if they fall, as I am sure they  
do, below the proper standard for your herbarium.

I am at present planning to go to Cambridge  
again on Wednesday, January 5<sup>th</sup>.

I am indeed sorry to hear that your sister's  
condition still causes you anxiety. But,  
every day that she lies on is so much to the  
good; and I hope she may be spared to your  
wonderfully unbroken family circle.

Thank you for the program of the Christmas  
music. We had a Christmas concert too,  
including the French "Noel"; but it was on  
the Victrola.

With love from all of us to you, and to  
Miss Brown and with my best wishes for the  
New Year Sincerely, as always.

C. D. S.

West Harwich, Mass.

Dec. 28, 1926

Dear Mr. Deane:

The mystery was duly kept a  
mystery until Christmas Eve - the time at  
which we always open our presents - and then  
my happily revealed. The three pictures make  
a mighty interesting piece of work and so far  
as the eclipse I saw is concerned, a very accurate  
one. The shape of the corona, the color, even the  
light clouds opening just about enough to let  
the sun show clear, are just as I saw them  
from my bed room window that cold January  
morning. It is a record which I am very  
glad to have, as you know I should be - and  
I thank you very much.

The holidays have been busy days for us  
and rather a chapter of accidents. In the  
first place, our friend Miss Corning, at whose

YORKTOWNE HOTEL  
MURRAY HILL TERRACE  
WING, D.C. U.S.A.

Instead of the usual present from my mother's sister-in-law, we got a telegram saying that she and my newest cousin - married in October - were recovering from the effects of an auto accident - not very serious, we judge, but enough to prevent Christmas shopping. - And I somehow "barked my shin" and somehow got the plan infected. It made so little local trouble that I did not realize anything was wrong until the lymph gland that lies at the top of one's thigh began to get sore and swell up. I wasn't really disabled but I did feel considerably used up, and my activities were considerably limited for some ten days. I am nearly all right again now - but the consequence is that I feel distinctly apologetic for the specimens sent you. I was in bed most of the day on which Mrs. mounted them and she had to work with rather inadequate supplies - particularly with some old cont-plaster which

hence we usually have Christmas dinner, fell down stairs on the 21<sup>st</sup>, am broke our arm, and had to go to the hospital. She insisted on our having the dinner all the same, with the friend who lives with her as hostess. We all made calls on Miss Corning at different times during the day and I was kept pretty busy taking people back and forth in the car. The day after Christmas we had my college room-mate and his wife here for dinner - very pleasant, and a fine Christmas snow storm a day late to go with it. Yesterday we spent all day on the Farm Journal index, and it is only now that we have been able to settle down to the Shanty. Your letters that are part of the pleasure of Christmas. We fare well, as usual, much raking the prize for size, sound and fury with a Victrola from the Washington friend - really an excellent instrument.

Mrs. Corning's accident was only one in a chapter of them more or less concerning us.
