DEPARTMENT OF BOTANY

April 25, 1923

Mr. Walter Deane
29 Brewster Street
Cambridge, Mass.

Dear Mr. Deane:

With regard to the matter of Carex stellulata I would say that I have prepared a revision of the group, but when it was nearly completed I found that Mr. Mackenzie had already a revision practically ready for the press. I wrote him offering him the use of my manuscript and suggested that he should do the publishing. Meanwhile I named up the material in the Gray Herbarium and sent it back to Cambridge. If Mr. Mackenzie's final paper differs greatly from mine I may still publish my results. I do not know how soon he hopes to have his paper out. We are both agreed, however, that C. echinata must be taken up for C. stellulata. Fernald had already come to that conclusion. We all three have come to the conclusion also that C. interior of Bailey must be taken up for C. scirpoides of the manual. My idea of the use of the other names will be found on the herbarium sheets. I suspect that Mackenzie will differ from me in making C. cephalantha a species.

Sincerely yours,

W/M

K. M. Wiegand
