

Agricultural College, Mich., Oct. 17 1885

My Dear Deane:

I can't help it. I have been too busy to write before.

Have looked over your plants. They were very nice. Thanks.

I send you a little parcel by express prepaid. On top you will find a few bittersnats, *Carya amara*. They are from the same tree as the leaves in the same bundle and picked ^{at} the same time. The oak, Q. rubra, numbered 1, is from the same tree from which I ^{once} gave you flowers, collected in '78 or '79, under the name of Q. coccinea. In my student days the tree was labelled Q. coccinea, but it is not so you can see at once by fruit. The no. 2, Q. macnabia, is from same tree as the flowers I sent you last spring. The same remark applies to 4, Q. alba, and 5, Q. tinctoria. The two labelled 3, Q. bicolor, are from same tree.

Your labiate is evidently some introduced *Salvia*.

Dr. Gray is changeable in regard to many of those *Dolidago*s. I have had an experience similar to yours.

Met Barnes? Yes, here it is in your letter. Fine fellow.

Oh, so many plants! A big batch of *Carica* from Oregon — no duplicates — two or three new species. All the *Caricas* of Purdue University to name! And now Mr. Morong has sent all his *caricas*! Three public lectures to write in 5 weeks! A lecture before class every day! and as much more!

Forgot that you wanted me to write names of *Caricas* in ink on sheet, so returned them with a slip on them.

No, var. strictior of *C. stricta* is n.g. Yes, all are the same, the var. specios — all *C. stricta* see Bot. Gaz. Sept. '84

How *Panicum dichotomum* is the autumnal state which Dr. Gray speaks of, as I understand it.

The *Cyperus Nuttallii* appears to be correct.

Zannichellia is evidently correct, but it has no frt.

I find that I made a mistake in my hurry and returned the *Caricas* which you intended me to keep. No matter, I did not need them.

Yours or

L. H. Bailey, Jr.

Bailey, L. H. 1885. "Bailey, Liberty Hyde Oct. 17, 1885." *Walter Deane correspondence*
