

College, Oct. 1, 1886.

My Dear Deane:

No, I have not *Cyperus Engelmanni*.  
Would like a specimen very much.

I congratulate you upon the amount of work you have been able to do in your herbarium. It is delightful work, but I get almost no time to do it.

Was sorry to hear of Mr. Churchill's illness. As you said nothing about it in your last letter, I trust that he is getting better. There is considerable typhoid in Lausung.

Shall be glad of *Aster tenuifolius*.

I don't know how you will succeed with Wheeler. Formerly he was one of the most delightful of correspondents but of late business has so engrossed his attention that I can't get much out of him. Write him,

anyway. Tell him that I referred you  
to him.

I was glad of the little *Gratiola*!  
found it in ~~that~~ form once in Mystic  
Pond.

I have written an "ad", for Gazette  
saying that I had a few sets of Carices  
for \$3.50 each.

The grass you return is evidently *T. tenella*.  
It is late and I am tired.

Yours as ever,  
L. H. Bailey, Jr.

Bailey, L. H. 1886. "Bailey, Liberty Hyde Oct. 1, 1886." *Walter Deane correspondence*
