Agricultural College, B. Q..

Ingham Co., Mich., Oct. 11 1887

My Dear Deane:

In your card of the 4th inst. you did not give me the address of Mrs. E. B. Kendrick to whom you wish me to send a Carex synopsis. I will gladly send her one.

I fully agree with you in wanting many specimens of a plant. One can never know a species well from one or two specimens. It has been many weeks now since I have any more than looked into my herbarium, and I am beginning to feel lonesome. The cold rainy days are coming, however, presaging a close of outside operations and suggesting the pleasures of the snug herbarium. I shall be very glad of all the interesting specimens which you promise me. Of course I am in no hurry for them, for it will still be some time before I get actively at work in my herbarium.

The baby's picture was taken when

She was 9 weeks old. She is the most advanced child of her age I ever saw. She begins to laugh and play, and is very interesting. She is the best specimen I have got, by all means.
We are all well.

Let me hear from you often.

Yours as ever,

L. H. Bailey, Jr.
