RURAL NEW-YORKER.

THE AMERICAN GARDEN.  
OUT-DOOR BOOKS.

Ithaca, N. Y., June 12, 1890

My Dear Deane:

Four letters from you, and here goes  
for the answers!

It is rather difficult to guess without seeing the specimen whether your *Carex lupulina* is the var. ~~foliolata~~ *pendunculata* or not. Your description would seem to make it so. But some of the intermediate forms are hard to place.

I don't understand why Britton should miss things so in the N. Y. Flora. But I suppose it is in the interest of reform.

I have ordered a free copy of the American Garden sent you, and I told the publisher that you would occasionally give us all note of some

interesting wild plant.

Do you go again to E. Jaffrey?  
I suppose you go soon. Let me know  
when I send letters there, and how.

I see no reason for calling  
Churchill's plant anything else than  
*C. bullata*.

I return Fowler's plants by this  
mail.

I have lots to do nowadays, and  
get no time for tramping in the  
woods. I am almost afraid that  
my days of botanizing are over!

Yours truly  
L. H. Bailey
