## STROMBUS LATISSIMUS.

Q++++++++++++++++++++++++

CHARACTER GENERICUS.

Animal Limax.

Testa univalvis, spiralis, latere ampliata.

Apertura labro sæpius dilatato, desinens in canalem sinistrum.

Lin. Syst. Nat. p. 1207.

CHARACTER SPECIFICUS, &c.

STROMBUS labro rotundato maximo, ventre inermi, spira subnodosa.

Lin. Syst. Nat. p. 1211.

Alata lata.

Rumph. t. 36. f. L.

List. conch. t. 856. Martini conch. t. 82. f. 832.

Alata lata.

Seb. 3. p. 163, t. 63. f. 1. 2.

Labio seu latere oris exteriore latius expanso distinguitur Strombi genus, et spargitur in plurimas species. E rarioribus est illa quam selegimus, in maribus Indicis, ut plurimum, reperta, sæpius major longe specimine depicto.

## WING STROMBUS.

\*\*\*\*\*\*\*

## GENERIC CHARACTER.

Animal resembling a Limax.

Shell univalve, spiral, enlarged on the side.

Aperture generally with a dilated lip, ending in a channel towards the left.

SPECIFIC CHARACTER, &c.

STROMBUS with very large rounded lip, smooth body, and subnodose spire.

Wide-lipped Indian STROMBUS.

WING STROMBUS.

The genus Strombus is distinguished by the remarkable width or dilatation of the exterior lip or edge of the shell: the species are numerous, among which that represented on the present plate may be considered as one of the rarest: it is a native of the Indian seas, and is occasionally found of a much greater size than the specimen figured.

Shaw, George. 1801. "The Wing Strombus, Strombus latissimus [Pl. 519]." *The Naturalist's Miscellany* 13(CXLVI), <a href="https://doi.org/10.5962/p.310965">https://doi.org/10.5962/p.310965</a>.
