THE  
SUMMER DUCK.

\*\*\*\*\*

*GENERIC CHARACTER.*

*Bill* broad and flattened; the edges marked with sharp lamellæ.

*Tongue* broad, and ciliated at the edges.

*SPECIFIC CHARACTER, &c.*

Duck with pendent variegated crest, chesnut breast spotted with white, and side-feathers lunulated with black and white.

The Summer Duck of Catesby.

*Edw.* pl. 101.

---

This most beautiful species is an inhabitant of many parts both of North and South America, migrating, according to the diversity of seasons, from one region to another. It is also found in some of the West Indian islands. The female is smaller, of a brown colour, and without any of that gaiety of plumage which so elegantly distinguishes the male.

Shaw, George. 1813. "Anas sponsa, The Summer Duck [Pl. 1037]." *The Naturalist's Miscellany* 24(CCLXXXI), -. <https://doi.org/10.5962/p.322317>.
