

can find I shall pack
up & send to you all my
spare specimens of Phoenogams
out of which Cary must take
what he wants, the remainder
you can put to better use than
I can.

I shall have your part
of the M. A. and several other
copies with you before the sailing
of 1st August steamer.

I rec'd a letter from Dr Taylor
of Ireland (of the old firm of Hook &
Jacq.) proposing an intercommunication
to - any thing from Brach &
Schimper since fasc. 25-28. *Grimmia*?

Yours very truly

W. D. Sutherland

Sent the orders.
Aug 6th.

Celebrates July 12/46

Dear Doctor

To day I left at
the express office for you a
parcel containing specimens of
Erynum *Arboreum* pro. & fl.
Arabis patens - *Hieracium pinnatifidum*
Dalmanium tricornum - *Enemion*
Internatum & *Uvaria triloba* -

This is all you asked for - I shall
send you some more print of *Hieracium*
pinnatifidum if it is not eaten up by
insects - that I send now may
arrive - I doubt if it often

matrices seed here - the pod
is very succulent & is generally destroyed
by insects - out of about a dozen I
was waiting on I found all the
other day gone but two or three, one
of them I now seed - the others
yet growing - hardly ripe enough
yet - but I think the *Corydalis*
ascumbent - Sprague must
make it out. -

I send 4 drawings - the plants
Nat. size was made by Robinson a
sort of a genius - a jack of all trades
travels with occasionally perceiving -
peoples faces - & collects a little for me
- he worked a good deal in the
Musc. Allegheny, gluing down the ~~plants~~

The descriptions I made all from

the subjects before me except the
mature fruit of papaw - all that
I A warrant right well it may
be the fruit is too much pedicella-
ted - this must be examined -

I did not receive yours about the
imbrication of petals of papaw until
the flowers were nearly blown - &
in fact only saw one flower in
proper state - that was clearly valvate
as was all ^(5 or 10) the dried specimens I
then re-examined - Now you &
Sprague can make each separate
series of the petals imbricate I don't
understand - and I can hardly
think the Ohio specimens are different
from the Pennsylvania ones -

The first spare day I

Sullivant, William S. 1846. "Sullivant, William Jul 12, 1846." *William Starling Sullivant letters* –.
