Columbus June 15/56

Dear Gray

Day before yesterday I
mailed to you MSS. from Jan. 32
to 47 inclusive — and before you
get this in type I will send
me the remainder — I shall
make no arrangement for filling
a gap between Acrostope & Gleeson-
ing, as I understand you do not intend
to begin on the last until the first is
set up. — It would have been better
as it turns out, if I had begun on
the Acrostope first — But when I got through
with the plates — the last three being Houghton
— they were running through my hair
so I put them ~~down~~ ~~down~~ next

was to put at the place where the
most work was required, and that
was Pleurospina - particularly Hypothena -
which is the feature of the Broadsht.

The whole thing has been done
crown-first Parkinson beginning at
the plates, backing through blocks.
Pleurospina done a second time.

There is one pleasant project
connected ^{with} it, and that is, that
I shall back out of the library of
it in 4 or 5 dogs more - for
I am very tired and that is the
reason I struck out indefatigable
in your preface which in all other
respects is very good - I made an
other erasure which is explained
on the back of this letter -
The composition of our Murchessy

with that of Europe would be
almost $\frac{1}{10}$ of the year species - If
it is necessary to indicate it (which I
do not in an Elementary concise of
this kind) better do it in the preface.

It appears to me you are going
to have an unusually large number
of Cephalis (250) struck off for me -
I should offer to make the supply
entire.

I will write you in a day or
two about the advertisement for Lesquene's
Museum. Yours truly

W. J. Gilliland

Sullivant, William S. 1856. "Sullivant, William Jun 15, 1856." *William Starling Sullivant letters* –.
