

Columb July 7 1856

D Guy  
The Explorations take more  
space than I expected - but they  
cannot & ought not to be reduced  
- better print them in some type of  
the Key -

Look over them this is the only  
thing I have sent without carefully  
revising - but I still think they  
are my best if not entirely right -  
- They should have been copied  
but could not be done without  
too much delay -

Very cordially L

W S Halloran

I'll send my paper  
in a day or two - have not read  
Jobs V, VI, VII, & VIII yet. -

Musci & Hepaticae  
of the  
United States  
(East of the Mississippi River)  
contributed to  
Greene's Manual of Botany

By W. S. Sullerant
