

will be here in a few days - but it will be some time before I get the plates. Many of them are prints - but there are some yet that have not been washed off. Our copies are printed quickly from the stone - all the others 23,300 copies! by Bamfor. Thanks for the prospectus of the Am. Soc. - Lunaria, Haskin &c. Keep an account of the charges against me, & we will settle account when we meet.

I ought to have told you, that I tried my best to have proofs of all Whipple's Bot. sent to you - but without success - & they would not send me reprints.

So Hooker talk of coming out! It is almost too good news to be true. If he comes in the summer I shall have to receive him at our stage on the Palisades - except a day or two soon home in town. Let me know what further news you have on this subject. Eliza has probably written you about her plans. She means to make you a visit - but I do not know at what time.

I have all the gold and one jewel now. They are well. We had a good holiday this week. He is going and going off to Boston to buy his studies. He wants the place measured. I have left no room for White Pot in Bay. I expect to see you before he returns. I have left you all about what I have been doing. Before next week I hope to be back to you again. Yours - J. Jones

New York, June 23, 57.

Dear friend -

Surely you will think I have forgotten you - but such is not the fact - Every day - & almost every hour you have been in my mind - but I have not written (except a few lines) to you, in a long time

I commenced a letter - week or two ago. I laid it aside (as usual) till I could settle a number that I wished to lay before you - & so I delayed from day to day - till I found myself all in arrears. & then I could not find time to tell you all I had to say -

I feared, too, that you would mind as you were with care, I should only trouble you with my question

Apart from my ordinary duties, I got interested in a chemical investigation respecting the means of preventing counterfeiting bank bills & other printed papers of much value. The difficulties were great & my ambition was a little excited by the failure of not a few chemists to accomplish a certain result. I have done the thing & have gained \$100.

The enclosed letters I ought to have sent you long ago. They were laid aside to go with my next letter - & this duty was neglected when I put off writing to you - Please ask Kochbein to sign the paper that I send & forward it to the Major Envoy. The Major said that the rules of the Dept. require this formality.

You probably rec'd. from me, lately, a parcel containing 50 sets plates for Prof. Pope. You can return the 10 extra copies of Beckwith's Almanac - & I will send you the plates for them - just as you like. My parcel for England will go soon - a friend will take care of it. Don't send copies of Beckwith's Rep. to Kochbein

What do you make of that Galvind genus from Expt-Exped. Plant? I could not refer it to any gen. that I was familiar with. Those drawings of Kochbein were admirable. He is a good fellow. I will be soon as good an artist as Sprague - besides being an easy man to get along with. There is a comfort in having him near one - I sent his bill to Wilkes - also, perhaps, has written to you on the subject. What is H. doing now? Is he willing to do any more work for Expt-Exped.?

I hope you will soon have time to put in order those Comprs. for Mex. Bound. The job will not be a difficult one for you.

Thurber says he will write to you about the paper -

I shall soon have for you such a quantity of letter press & plates of P. Whipple that there will be a balance against you. I think the plates are to cost \$1.30 a hundred, but I am not sure just now.

My extra copies of the letter press

Torrey, John. 1857. "Torrey, John Jun. 23, 1857." *John Torrey letters* -.
