

this var. with α . The genus *Scleropus*
Schrad. is founded on an abnormal state of
Amblygonia *Wieg.* I have both genera on
one specimen!

Scott writes to me that ^{he} lost his best
collections on the Akate, owing to the bad
arrangement of the officers. In their dis-
putes as to whether ^{his} Naval or the mili-
tary should take precedence, the means
& subsistence of transportation were not
provided, & there was much loss & suffering.
Nevertheless some plants were collected on
the return of the Expedi. - of which I
shall have a small set very soon. Very
likely there will not be many new things
among them. St. Granada has been
richly well explored.

Yours ever -
John Torrey

P.S. The volumes of the Pacif. R. R. Report can be purchased
here for \$2.50 each. One of them is nearly filled
with Bot. sketches - including Cact. & plants - *Sulowia* &
Wicker, *Bipolaris* papers & materials. I shall
purchase 2 or 3 copies for presents.

New York, July 29th 1858.

Dear friend -
Your letter of the 27th was
received this morning & must have
crossed mine - The cost of the
50 additional sets of Cactaceae, sent to
Bigelow, is \$14.94 which Thumber
will pay me some time.

I am pained to hear of the Mr. Gilroy,
top. It will be felt severely by all the
Hooker family. Poor old Dawson & Turner
must have outlived his usefulness by
many years - I hope he became
a truly Christian man before he ended
his probation - for I am told that his
earlier days were very exceptionable -
So Bonpland has gone at last - after having
been announced at dead once or twice
before! He seems to have done but
little for Botany after returning to
America - but he drew his pension to the last.

I am glad that you ^{have} Dupuis' Copy of R. Br.
Prodr. - but I wonder that *Vilmonia* *lebit*
go out of France -

If I can get off next week I will try
to run to Cambridge - but I am not sure
yet. Good news that about the Con-
servatory - but I regret that the superinten-
ding of it will prevent you & Jane from
taking the expected trip to Montreal. Our
girls would be so glad to see you both
at our Palisades retreat. - Well - we
shall hope to see you before we return
to the city. Should I go to Cambridge
- you may be sure the children will not
annoy me. Very likely I shall be with
them as much as ~~possible~~ with you in
the study.

Thunberg - long ago, took out a copy of
Cactaceae plates for you. Have you
the volume of Pacific R.R. Report containing
W. Whipple? I received the whole work
lately - after many fruitless attempts.

I suppose we must be contented
with 100 extra copies (in all) of
Mex. B. Botany. There are 60 plates.
- of these cost no trifle - Perhaps
Thunberg may wish a dozen copies in
to. I shall try to get several
copies of the whole volume - a case
of both volumes - Every will surely give
me more than one - & I may get others
from members of Congress. Congress
voted none for the Dept. of the Interior!

Do you know whether Engelmann will
remain here a few days before going west?
I shall be delighted to see him - I'm
about a week he ought to be here

Will you send me a character for
Mimosa Berlandieri? Schott found it on the
Llanos Rio Grande

As to Wright's No. 582 (partly) I have it not
but it is very likely the same as a plant
of Schott, which I have called (Mex. Bound. Bot.) *Sar-
silla Berlandieri* var. *fimbriata*. I have
specimens of a *Sarothra* from Sonora. aff. *congesta*

Torrey, John. 1858. "Torrey, John Jul. 29, 1858." *John Torrey letters* –.
