Note on a Circle of Stones situated in the District of Eusoofzye, by COLONEL SIR ARTHUR PHAYRE, Member of the Asiatic Society of Bengal. (With a plate.)

(*Vide* Proceedings A. S. Bengal, for January, 1870.)

About fifteen miles east of Murdan, the head quarter station of the corps of guides, in Eusoofzye, near a place called Sung Butté, is a remarkable circle of tall upright stones. These stones, or masses of rock, consist of rough slabs of granite, with a few squared, or otherwise worked pillars of the same material. Only ten of what appear to be of the original size, are now in an upright position. The rest lie upon the ground, some broken and some half buried in the ground. Two or three though still upright are the mere stumps of the original stones. The accompanying plate will render detailed description unnecessary, but a few remarks may be acceptable.

The circle has been over fifty feet in diameter. The highest of the pillars which remain upright, is about eleven feet. The largest of the rough slabs, which have the appearance of being in the state in which they were quarried from the rock, is about the same height, two and a half feet broad in its broadest part, and two feet thick.
