

I will urge Beaufort to have his say
on the Taxonomy & Phylogeny of the
Teast book, if ever so short.

Thanks for trying to get me Zamia
of Florida. -

I am still at Madan Rubicon &
have just done Psychotria so I am
well on. I find that the work gives
satisfaction in Redie, which is a comfort.
Clarke is busy putting the Committee in
order for next despatch, after which I
shall let him go on.

The last sheet of the Plant. Gymnospermy
is under my hand. Beaufort is
 $\frac{1}{3}$ through Brehm (~ 4 months).
Nichterlein (in the offhand way)
has arrived with a collection of some
500 species. He returns at end of July
after distributing his plants of which
you shall have a good set. There are
many new species.

Perrin of Lian is here with large
collections of which he will give us 100
but not. He has quarrelled with the
Jardin des Plantes.

require the price of purchasing
Caneel Garden Market &
space.

Now let me

thank you & the Rep. most heartily
for your kind trouble - I do enjoy
them immensely & have distributed
to Oliver, Harriet, Smith & others
as to comparing them with English
apples. (when there are any, there are
none this year) it is impossible.
We have nothing like them, any more than we have
like your Newton pippin or others?
Indeed names, all are sweeter, & far &
more juicy than any English we have.
So also I suppose you have nothing
like our Ribston pippin or Monarch.
It is impossible to say that any of
them are better than the others - what
you best as follows is, is the uniformity
& abundance of blossoms - so too with
your peaches, we have only a few &

Hooker, Joseph Dalton. 1880. "Hooker, Joseph D. Jan. 14, 1880." *Joseph Dalton Hooker letters to Asa Gray, 1873-1890*
