

GEO. ENGELMANN, M. D.

3003 Locust Street.

St. Louis, Mo., April 29, 1891

Dear W. That would be a small *Yucca* indeed, if *Yucca* it was, but fruit and inflorescence pronounce it an *Agave*. It is my *A. Schottii*.

Lawson ought to get many living plants for sale, and still more of *A. parviflora* which would be a treasure.

Curtis sends a new *Yucca* (*Y. Caroliniana*) from N.C. What is it? He gives of "*Y. Canadensis*" from N or S. Carolina? Sent me 2 or 3 leaves of all such. I suspect that I have seen in there 2 years ago. I am sick in bed since a week, no thought or rather no possibility of travelling. Yours truly G.E.
