

To there any possibility  
of introducing the  
Weever from N.  
America?

Melbourne bot. &  
gardens  
24. Jan 61.

My very dear Professor.

I took the earliest  
opportunity of in-  
forming you, that  
I have through a  
friend, Mr. Stephen  
of Seelong, forwarded  
to you the pairs  
of plants, which ac-  
cidentally came into  
my hands, but were  
destined for your  
herbarium. He left  
by the Lord Raglan<sup>s</sup>  
a few weeks ago  
& with our craft  
after his arrival  
in England.

the Atlantic

He has also charge  
of a few papers for  
you, I think also  
of the report on the  
Wurdkin plants, in  
which I had an oppor-  
tunity of referring espe-  
cially to your admirable  
work on the U. S.  
Explor Exped.

My report, descri-  
bing the results, both  
geographical & phyto-  
logical of my last  
alpine journey will  
probably by this mail  
go to you. That I  
found a new genus  
of Vaccinaceae, i.e.

*Wittsteinia varrini-*  
*acea*, will interest  
you. When returning  
from my autumnal  
journey I sold over  
the vast amount of  
specimens I have to  
give away, & cer-  
tainly I will pay them  
my debts to the ex-  
cellent men, who  
so liberally have en-  
riched our public  
herbarium with A-  
merican species.

Can I serve you,  
your scientific friends  
& academies in any  
way, pray command  
my service.  
Yours ever attached  
J. W. Wulke
