

though Dr. Mueller has
arrived, which passed
into my possession,
has proved also rich
in N. Amer. species still
of course it is but
a very imperfect series
of the actual species ex-
isting in your most domi-
nating, & new explorations,
such as Prof. Brongniart's
must have largely added
to the species.

The 5th vol. of the
fragments is about
half printed & con-
tains mainly new plants
from N. S. & Australia
of Turian type.

Does your roadway
require anything from
here?

Ever your
P. W. Mueller

23/8/65

At last, dear Prof.
Gray, I shall have
an opportunity to
send a consignment
to you directly by
the "Patrick Henry,"
which ship it to sail
in the ninth of next
month for New
York. I will des-
patch a box with
dry plants, contain-
ing among them too
some plants a good
many from the tro-
pical east coast of
Australia. There will
be also some duplicates
of dry plants & liter-

wise a quantity
of seeds. I shall
take the liberty
to enclose a few
with reptiles &c
for Prof. Lyell's
museum.

Through Dr. Sower,
you will have received
some of my new ve-
getable cutt on the
9th from Mr. Secary
to London through
Mr. Osborne, my dear
and intelligent good friend,
^{your and my good friend} some other publications,
which he kindly took
with him for you
when he quitted Austra-
lia. Dr. Sower will
also send out you a

collection of 359 nos.
of seeds. Now since
man is restored in
your country, new
encouragement will
arise to pursue
scientific researches.
I will do my best to
furnish material
for your Museum, though
my engagements are
so numerous, that I
cannot go any longer
into the field myself,
nor get much leisure
to make up separate
collections. But I will
do what I can. I feel
I am largely in your
obligations, for there is a
beautiful display of
N. American plants in
my Museum, varying
received from you,

Mueller, Ferdinand von. 1865. "Mueller, Ferdinand von Aug. 23, 1865."
Ferdinand von Mueller letters to Asa Gray
