

vacuiflora, - *capitata*
minutius.

Wm. W. R. R.
Dec. 1864

I find I must send the
little book by some other
course, - not by post. -
So I detain it for the
present. —

Pickman, W.
1. V. 1864

My dear Sir,

I send you by this mail
a little work for reference
in Botany. The package
will tell you that it was
brought about.

In the last No. of the
Nat. Hist. Rev. I put a
brief memorandum upon the
matter of the Harrell on
Admiralty? I have not re-
ceived any separate copies
so that I have not been
able to send you it. In-
deed it is hardly worth my
mentioning. My lecture
begins tomorrow.
I have been examining
some interesting plants

from W. Trop. Africa, Hance
a little notice for the Lib.
Voc. of H. new species
(- Phytolipus - Munacaea
Phacanthaceae - : Phaptopetalum
an olacacea with 2 stamens
Munadelpheus, - ^{crucifera} 4-celled ovary
& several nuclei in each cell.
— : Lepidocladus, Lepanaceae
with 4-pd stamens & Scleranthus
& Geminata nuclei, - : Octo-
lepis, Hymelocaeceae with
4-celled ovary & nearly hypogynous
stamens - approaching
in Pitit Scissoloma Phu-
acaceae v.) — also a
fine new Pereskia, the
I do know, — 1 big Malayan
1 Madagas., 1 Guinean.

I have been lazy in
replying to M. & Harbner's beaut-
iful Noct. Nat. Hist.
kindly forwarded to you.
As Mepalus no 121. I did not
match in 186. book.

129. As Nep., may well be referred
as var. of A. sparganoides as you
suggested.

126. I do not find authentic
specimens in 186 book either of
A. layii or A. Shortii. I do
not see how A. humilis, Desf.
differs, — but I see you unite
them in your Synopsis
167. D. debilis, Esch., — is this
not a form of D. rivularis (Cypr.
bona)?

Senecio Sena, Hb. differs mainly
from D. triangularis in its folia
basi angustata, — pinnate

Oliver, Daniel. 1864. "Oliver, Daniel May 1, 1864." *Daniel Oliver letters to Asa Gray*
