

Ⓐ

355 Commonwealth Avenue, Boston, Mass.

October 24th, 1921.

My dear Dr. Standley:

As I finish work on the different genera or on groups of species would it not be well to return the National Herbarium material? If a record of the sheet numbers has been kept this plan would be a simple one to carry out and would relieve me of anxiety and make room in cases that are already pretty full. The only objection to a return of a part of the different loans is that the recording system may be upset.

I have just come across another Cuban element in Harry Johnson's Alta Verapaz specimens.

Yours sincerely,

John Chase
